

RUCHA BHATT

Mobile Engineer · Android & Kotlin Multiplatform

London, UK | joshirucha0807@gmail.com | 07853 830973 | github.com/RuchaBhattJoshi | linkedin.com/in/ruchabhattachjoshi

Mobile engineer specialising in **Android**, with hands-on **Kotlin Multiplatform** experience in production. I've shipped consumer apps to **18M+ users** in fintech and built early-stage products across multiple industries — owning features end-to-end, from architecture and security to production monitoring. Product-minded and proactive, now working with an **AI-accelerated workflow** to ship faster without compromising quality.

5+ yrs Android (native)	3+ yrs Kotlin (primary)	1 yr 3 mo KMP (alpha-era adopter)	6+ industries shipped
----------------------------	----------------------------	--------------------------------------	--------------------------

CORE SKILLS

Android	Kotlin, Java, Jetpack Compose, XML→Compose, Coroutines, Flow, RxJava, Performance Optimisation
Cross-Platform	Kotlin Multiplatform (KMP), Shared Business Logic
Architecture	Clean Architecture, MVVM, MVI, SOLID, Dependency Injection, Unidirectional Data Flow
Quality & Testing	JUnit, Mockito, Espresso, Test-Driven habits, Code Reviews, Profiling
Security	Encrypted Storage, Biometric Auth, Certificate Pinning, Rooted-Device Detection, ProGuard / R8
Tools & AI	Git, JIRA, Google Play Console, Firebase, Sentry, CI/CD, GitHub Copilot, Claude Code

EXPERIENCE

Mobile Engineer **ClearScore / DriveScore** London, UK · Oct 2021 – Jun 2023

- Consumer fintech serving 18M+ users across multiple markets, spanning native Android and a Kotlin Multiplatform product.
- **ClearScore (Android):** drove **XML→Jetpack Compose** and **RxJava→Coroutines** migrations across a large multi-module codebase — documenting strategy, training the team, and enabling cleaner A/B experimentation.
 - Implemented **Clean Architecture** (MVVM / MVI) and applied **security best practices** (encrypted storage, biometric auth, certificate pinning, rooted-device protection) and accessibility standards.
 - **DriveScore (KMP):** contributed hands-on to a **Kotlin Multiplatform** product in production (~1 yr 3 mo) as an **early/alpha-era adopter** — shipping shared business logic and keeping feature parity across platforms.
 - Owned features end-to-end — from architecture through CI/CD release to production monitoring (Sentry, Firebase), prioritising hotfixes by crash rate and user impact.

Android Developer **(Freelance)** London, UK · Feb 2021 – Sep 2021

- Architected Android apps from scratch; defined code-quality and testing standards; delivered independently with direct stakeholder collaboration.

Android Developer **MyLearnMate (EdTech)** Remote / USA · May 2020 – Oct 2020

- Early-stage EdTech maths startup — researched and set the mobile tech direction, and built a consumer Android app on a short contract.

Android Developer **TextVibes** London (Google Campus) · Feb 2019 – Jul 2019

- Early ML-powered app surfacing meaningful messages from loved ones into a diary — migrated legacy **MVC → MVVM / MVI** and modernised the architecture.

Application Support Engineer **Long Tall Sally** London, UK · Jul 2019 – Sep 2019

- Support ticket triage (JIRA / Confluence), application performance monitoring, and automated test cases within an Agile team.

Android Developer **Zaptech Solutions** India · Mar 2015 – Nov 2017

- Software services company delivering consumer apps across education, agriculture, and lifestyle sectors.
- Built and maintained consumer Android apps end-to-end — full lifecycle from build through to production maintenance; modernised legacy codebases to MVVM and contributed to architectural decisions.

EDUCATION

BSc, Computer Engineering, Gujarat Technology University (2012–2015) · **Diploma, Computer Engineering**, Nirma University (2009–2012)
